

Farming for the Future

March 8 2017

Bill Copeland Precision Ag Services Inc
Wauseon, Ohio

Things That Don't Work for the Most Part

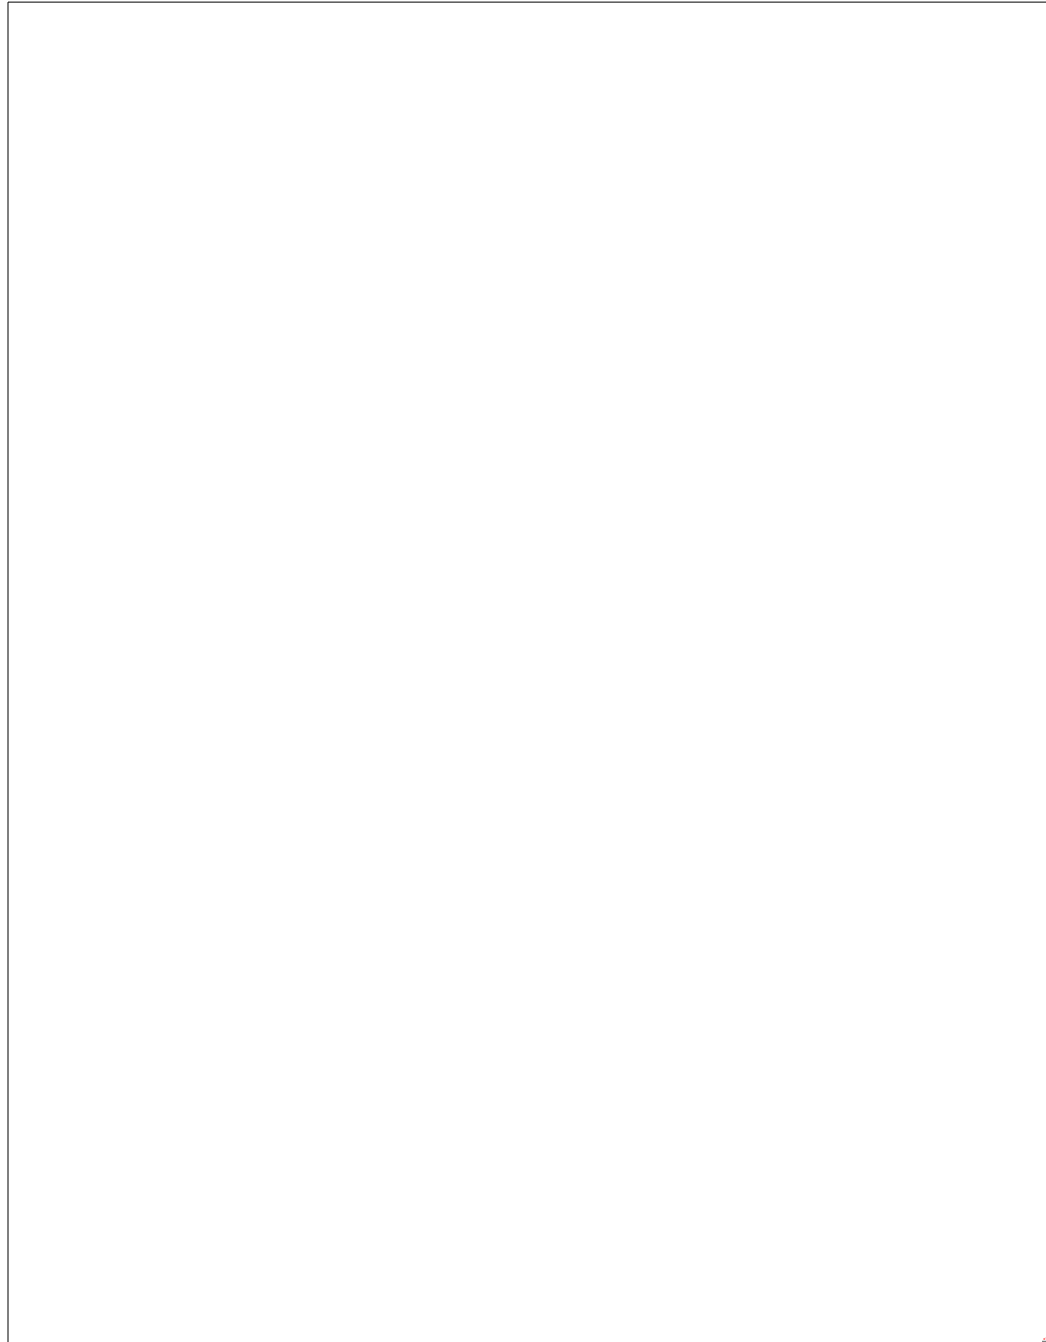

- Zone Sampling for P, K, pH.
- Pop up Fertilizer
- Most Foliar Sprays
- Gypsum (in this region)
- Yield Based nitrogen recommendations.
- Little dab will do you products.
- Hi Cal lime over Dolomitic Lime.

Things That Do Work For the Most Part

- Good Soil Health
- Proper Seed Placement
- Prescription based planting rates.
- Fine Lime
- P and K Where it is needed.
- Accurate soil sampling.
- Sensor based Nitrogen Application
- Data Analysis
- Auto Steer.

What gives me the wisdom for
these statements?

- Grey Hair
- Data (Over 500 GB)

Data Analysis Ran for Customers

- Yield to Variety
- Yield To Singulation
- Yield to Skips
- Yield to Doubles
- Yield to Population
- Yield to Population by Variety
- Yield to Soil Type
- Yield to Drainage Class
- Yield to Variety by Soil Type
- Yield to N Applied
- Yield to NDRE
- Yield to Phosphorous Levels
- Yield to Potassium Levels
- Yield to pH
- Yield to Magnesium Levels
- Yield to Calcium Levels
- Yield By Planting Date
- Singulation to Hybrid
- Singulation to Planting Speed
